

## Midwest Petrochemical Company Continues Track Rollout

Houston, Texas — September 2008

Management Controls, Inc. announces major Midwest petrochemical company continues Track™ implementation in 3 refineries and 6 chemical plants throughout the United States. This company selected Track™ in June 2007 for deployment across its refining and chemical enterprise. Implementation included integration in to the client's instances of access control systems, MRO Software's Maximo Enterprise Suite, and other legacy systems.

The Port Arthur and Odessa, Texas sites were the first to undergo implementation in early 2008. Completed in the latter part of 2008 were the Joliet and Peru, Illinois sites. Two Illinois refineries are the client's first sites to implement the gate access system interface to Track™. Deployment of Track™ at in all four was completed by the companies IT team with minimal support from Management Control, Inc. Five more sites are to complete implementation in 2009.

"We worked side-by-side with the client's IT team in a train the trainer role at the first site," says David Bushong, the Track™ implementation consultant. "They have taken it from there and have done a great job as they rollout Track".

**About Management Controls, Inc.** – Track™ software, created by Management Controls, Inc., automates the business processes of service-based contracts – from project time-keeping through invoicing – and delivers actionable information that clients and contractors require to complete projects on-time and on-budget. Track software accurately validates, calculates and compiles the hours and costs of contracted work, delivering project status on a shift basis. Using this real-time information, owners and contractors work collaboratively to manage projects more effectively – for their mutual and individual benefit. For more information, go to [www.tracksoftware.net](http://www.tracksoftware.net).

**About Client** – Client is an independent refining and chemicals company. It strives to create value for its customers and society – through the way its facilities operate, its efficient use of resources, the products it produces and markets, and its involvement in its communities. Client operates refining complexes in Alaska, Minnesota, and Texas with a combined capacity of more than 800,000 barrels of crude oil per day. It serves as a leading producer of petrochemicals and related products with manufacturing facilities in Illinois, Michigan, and Texas.
